

THE ACCESSIBLE EPITRANSCRIPTOME: HOW ANYONE CAN INCLUDE RNA MODIFICATIONS IN THEIR RESEARCH

Alida Biosciences, Inc.

Workshop Summary

The goals for this workshop are (1) to provide a concise overview of the state-of-the-art of epitranscriptomics such that participants can assess the value of including RNA modification analysis in their research, and (2) to host a discussion on options for epitranscriptomic analysis and provide an interactive tutorial on data analysis, with emphasis on Alida Bio's software. Participants will leave with a better understanding of how epitranscriptomics can enhance their research and the options for performing RNA modification analysis.

Company Summary

Alida Biosciences Inc. is an epigenomics company founded in 2020 that is focused on commercializing accessible tools that will enable the broader application of epitranscriptomics in life sciences. Our first product offerings enable researchers to read multiple RNA modifications concurrently with relative quantification, using RNA inputs compatible with the analysis of clinically relevant samples and user-friendly bioinformatics. <https://alidabio.com/>
